Seasonal Carry Over of Wet Tires

With the infrequent and unpredictable use of wet tires over the course of a season, Michelin considers periodic inspection of wet tires in a teams' inventory to be a good practice. The intent of this inspection is to ensure aging or storage conditions have not adversely impacted the tires, potentially degrading tire performance.

As a courtesy to each of our racing partners, Michelin will begin performing inspections at the Roar before the 24. To have your team's tires inspected, please bring them to the Michelin tire compound on mounting day.
