Re: IMSA WeatherTech Championship Testing Limitations

For the WeatherTech Championship, the testing limitations are modified as follows:

Private on-track testing remains prohibited. However, all other forms of testing permitted by the 2020 Sporting Regulations, including but not limited to: wind tunnel (full and scale models), climatic tunnels, straightline, 7 / 8 post rigs, kinematics & compliance rigs (static and dynamic), driver simulators, etc. may resume starting on June 1, 2020.

Unless further prohibition or modification of the testing limitations are required by prevailing circumstances, private on-track testing for the WeatherTech Championship shall resume starting on July 1, 2020 in compliance with the 2020 Sporting Regulations.

IMSA strongly support compliance with CDC, OSHA, local, state and federal government recommendations to prioritize the health and safety of our competitors and the surrounding communities and recommend refraining from participating in future private-on-track testing (and any activities that increase travel and interaction with others) during the 14 days prior to load-in for participation at any IMSA event.
