Date: October 8

Re: VIR Paddock Scooter Prohibitions

For clarity in correcting an oversight in the VIR Official SR, IMSA Sporting Regulations Article 20.3.4. shall supersede the language of item #11 in the VIR SR regarding permitted vehicles in the Paddock.

20.3.4. Motorcycles, drones, bicycles, skateboards, rollerblades and other non-motorized transportation, as well as motor scooters of one, two or three-wheels and/or designed to transport one or two persons, are prohibited in the garage, pit and/or Paddock areas with the exception of authorized power-driven mobility devices (ADA requirements - Americans with Disabilities Act), and accredited and vested media personnel. Pit vehicles must only be operated by an IMSA credential holder. Motorized carts and similar 3- or 4-wheeled conveyances must not be driven into pit lane except pit equipment approved for a Series or as specified in the SR. Such use in the Paddock must be for legitimate purposes only. Excessive speed and/or unsafe operation is prohibited. Participants must abide by state laws and Promoter restrictions regarding licensing, maximum speed, helmet requirement and use. Such conveyances may be prohibited at certain Events or in certain areas of each facility by local ordinance or Promoter limitation.
