

Detroit Grand Prix Belle Isle Street Course

IMSA DIRECT INTERNET SUMMARY

1.1 OVERVIEW

At the Belle Isle Street Course, and at all applicable events moving forward, IMSA will be utilizing a Team Ethernet Solution to replace the cable modem system (CMTS) for IMSA Direct Internet (IDI) access as well as live video channels (QAM) from the event.

Orders for IDI at Belle Isle Street Course must be submitted prior to 6:00 PM EST on Friday, May 27. To submit your order, please visit <https://merg.imsa.com> and go to Services > Internet.

1.2 ETHERNET BENEFITS

- Improve efficiencies and streamlines support within the IMSA Event Technology staff
- Eliminates RF noise issues that exists with the CMTS solution
- Eliminates specialized European Arris Cable Modems
- Provides up to 25Mbps full duplex connections to team switches

1.3 PIT LANE / PADDOCK DETAIL

Pit Lane IDI will be provided through the IMSA routers currently used to provide Timing and RCNS (instant messenger). The hours of operations will be approximately one (1) hour prior to the first scheduled IMSA session until approximately one (1) hour after the last scheduled IMSA session of the day.

At the Belle Isle Street Course, Paddock IDI will not be offered nor will paddock TV feeds. For paddock Internet services at Belle Isle Street Course, please contact Kevin Rose at kevin.rose@penskecorp.com.

Each team will need a network router to connect more than one computer to the *IMSA TP-Link* switch located on the pit road and/or at transporter. IMSA will provide an open ethernet port on the *IMSA TP-Link* switches along the pit lane and/or the transporter line for each team that signs up for the 25Mbps Internet service.

1.4 SUPPORT

Please feel free to use teamsupport@imsa.com as the primary way to submit any questions and support requests. Doing so will give you greater access to the IMSA technical support team at large instead of just those on site.
