## Storylines

### TAKIN' IT DOWNTOWN

The WeatherTech Championship raced a dozen times on the notoriously bumpy temporary course at Belle Isle Park from 2007-2022, but now the Detroit event returns to where it all started with a Formula 1 race in 1982 – on the city's downtown streets. A new circuit with a unique split pit lane provides intrigue heading to the Motor City.

### SUPER SPRINT

The Chevrolet Detroit Sports Car Classic, at 100 minutes, is one of two ultimate sprint races on the WeatherTech Championship schedule. It calls for a very different race strategy than for the other races that are each two hours, 40 minutes or longer.

### TIGHT CHAMPIONSHIP RACES

The two classes racing at Detroit – GTP and GTD PRO – each feature tight battles atop the point standings. The No. 7 Porsche Penske Motorsport Porsche 963, winner of the season-opening Rolex 24 At Daytona and a podium finisher in all four races this season, holds a 50-point advantage on the No. 31 Whelen Cadillac Racing Cadillac V-Series.R in GTP. In GTD PRO, the No. 77 AO Racing Porsche 911 GT3 R used its May 12 win at WeatherTech Raceway Laguna Seca to take a 56-point lead on the No. 14 Vasser Sullivan Lexus RC F GT3.

### WHO'S HOT?

**No. 7 Porsche, No. 31 Cadillac:** With a string of six podium finishes in its last seven races dating to the final three events of 2023, the No. 7 Porsche Penske Motorsport Porsche 963 is undeniably the strongest GTP car of late. But don't look past the No. 31 Whelen Cadillac Racing Cadillac V-Series.R, which won the 2023 championship and has claimed three second-place finishes already this season.

### WHO'S GOOD HERE?

**Anyone's Guess:** Since this is a new circuit for everyone, it's hard to gauge who will be strong at Detroit. If the other temporary street course on the schedule, Long Beach, is any indicator, the No. 01 Cadillac Racing Cadillac V-Series.R came out the winner there in GTP. The GTD PRO class did not race at Long Beach this year but the No. 14 Vasser Sullivan Lexus RC F GT3 was victorious there in 2022.

**Jordan Taylor:** They may have all come at Belle Isle, but Jordan Taylor has more wins in Detroit (5) than any other IMSA driver.

## 2024 IMSA PHOTO-VIDEO RULES

- Photo vests must be worn, with the vest number clearly visible, when shooting trackside.
- Photographers are allowed on pit lane before an on-track session begins but must move to the cold side of pit lane three minutes before the session begins.
- Only IMSA gray vest photographers are allowed over the pit wall when the track is hot.
- Do not stand on the pit wall – sitting on the pit wall is OK if your feet are on the cold side of the wall.
- Photographers may shoot from open pit boxes.
- Please get prior approval from a team before entering their paddock area or pit.
- Photographers are not allowed over the wall during red flag stoppages.
- Monopods may be used on the ground to provide stability to a camera, but not to extend the reach of the camera and may not be held out over the racing surface (including pit lane) at any time.
- Tripods should be kept at least 3 feet away from trackside walls and barriers.
- Never place any objects on the walls and do not lean or come in contact with the walls, including under yellow flag conditions.
- Never cross any portion of the track outside of the designated crossing schedule.
- If an IMSA official, track employee or security asks you to do something, please follow the direction of the official and then contact Dawn Zinsmaster (IMSA PR), Merrill Cain or Edward Williams (Detroit PR) for assistance if needed.
- IMSA Gray Vest Photographers
  - On the hot side of the wall, firesuits, closed-toe shoes, a helmet and your IMSA gray vest are required.
  - During practice and qualifying, gray vest photographers are allowed over the pit lane wall with a helmet and firesuit, but must stay out of the pit box of any car being refueled.
  - During the race, a photographer with a gray vest, helmet and firesuit may cross the pit lane and shoot from the island but may not shoot in the pit lane itself. Crossing is only allowed when the pit lane is empty. If a car is in the pits, or equipment is laid out for an arriving car, do not cross until the pit lane is empty.
  - IMSA series photographers wearing IMSA series firesuits are the only photographers allowed to work in pit lane during the race.

## Risks

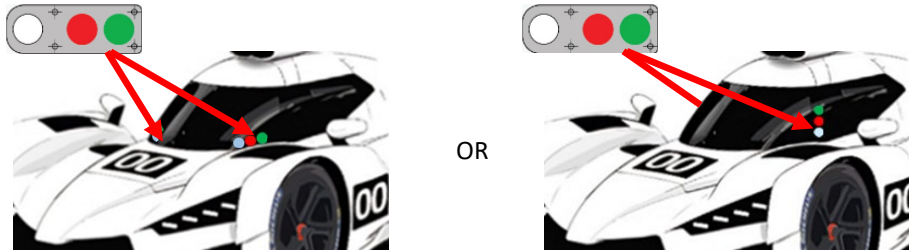

GTP cars feature electrical systems operating at 800 V  
These voltages can create life threatening electric shocks

## Indicators

At all times, when the car is in the paddock/on track, the lights will be functional and must be obeyed

*Blue Light Indicates Medical*

*On first switch on, the red light will illuminate for 2 sec to show the light is working. This does not indicate a fault.*

*"Green Light" indicates a safe race car.*

*If any other combination of light is lit or NO light, consider the race car "unsafe"*

HV Safety Light Status	INDICATION	DESCRIPTION	SITUATION
GREEN		High Voltage System OK	CAR SAFE
FLASHING RED		High Voltage potentially present on the surface of the car	UNSAFE TO TOUCH
OFF		High Voltage System Status Unknown	UNSAFE TO TOUCH

## CAR UNSAFE PROTOCOLS

1. Do not touch car
2. Alert people in vicinity of the danger (shout) to stay away
3. Ask for HV emergency to be communicated to HV Safety Officers (identified by armbands)
4. Establish cordon or safe zone around the car (verbal or physical)

## HVSA (Quarantine) and HVI (HV Isolation)

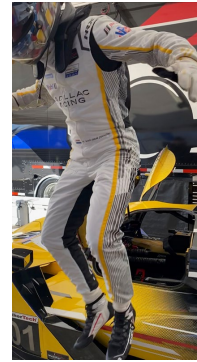

- HVSA will be an area that is accessible to vehicles from both racetrack/paddock and close to the pit lane.
- HVI is an area for cars that have terminal issues (including fire/thermal runaway) and is away from the public.
- Should a car become **UNSAFE** at any time on track, the IMSA Manager (Track Services) will lead recovery to one of these areas.
- Should a car become **UNSAFE** at any time in pitlane, the IMSA HV Safety officer will be notified and lead recovery to the HVSA.
- Should a car become **UNSAFE** at any time in the paddock or team area, move people away, establish a cordon and notify IMSA/OEM/Team HV Safety Officer (Armband wearer)
- Cars will not be released from HVSA until given permission by the IMSA HV Safety Officer.

## Driver exit

In case of need to exit a car in an UNSAFE condition:

- Do not touch ground and Car at the same time
- No assistance to be given
- Exit via door onto sidepod
- Stand on sidepod
- Jump away from Car and onto ground with one clear motion
- Do not touch Car

Should this not be possible, track services will lead extrication.

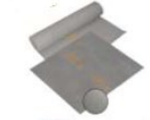

## HV Safety Equipment (PPE)

At all times, when the car is in the paddock/on-track, the following equipment will be in the near vicinity of the car:

Gloves

Rubber Matting

Signage

Rescue Hook

Barriers

## USE OF HV RESCUE HOOK

When a person is receiving an electric shock (e.g. they are touching an UNSAFE HV car that has become live, they may be unable to release contact due to muscle contraction).

In this case, DO NOT TOUCH THEM DIRECTLY. Use the rescue hook to pull them off the car.
