MMC-IMSA-2025-03_2025 Michelin Tire Development Tests

Michelin Motorsport Communication

Dear LMH and LMDh partners,

In cooperation with IMSA, Michelin has organized two new test loops for our Slick Tire Development program in 2025.

1. **Slick Tire Development test on the 17th of March 2025 at Sebring International Raceway**
2. **Slick Tire Development test on the 23rd of June 2025 at Watkins Glen International**

We kindly invite all LMH and LMDh Constructors to join these slick tire development test sessions with one car per OEM.

These two tests will **not** be counted against your 2025 Manufacturer test days allocation.

These two days will be fully dedicated to testing new development Slick tires for the 2026 tire range.

A reply to hans.emmel@michelin.com by the 15th of January 2025 would be much appreciated for both test sessions.

Michelin will cover the costs of the racetrack rental, garages, catering, and all tires used at the test days.

Thank you very much for your valuable support
